Chairman Michael Powell Federal Communications Commission 445 12th Street, S.W. Washington, DC 20554

RE: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to ask that the FCC not impose new hidden charges and fees on prepaid calling card services.

Minorities, lower-income families, senior citizens, immigrants, college students and military families rely upon calling card services for a variety of needs. Many of these consumers do not have the credit history, bank accounts, or the means to pay a large deposit for local telephone service. For these consumers, a prepaid card may be the only option they have to stay connected – to make phone calls to look for a job, for affordable housing, make a doctor's appointment, or stay in touch with family and friends.

These cards offer convenience and predictable cost, as there are no hidden fees or charges. In economically disadvantaged areas, consumers literally risk being disconnected if the prices of these cards increase. Prepaid calling cards are indispensable for these and other consumer groups because they are an affordable alternative to regular and wireless telephone services.

But such price hikes are precisely what the FCC will do if it inflicts new "in-state" access charges and other fees on pre-paid cards. The fees would funnel directly to large local telephone companies while the burden would fall squarely upon those consumers that can least afford to bear it.

Adding access charges to be paid to local telephone companies will substantially increase the per minute charges on pre-paid calls, jeopardizing the benefits Hispanic and other communities gain from these services. Please stop any effort to raise rates on American consumers and decide that these services are not subject to the exorbitant new access charges and other fees.

Sincerely,

ccs: Commissioner Michael Copps

Commissioner Kathleen Abernathy

Lucas Jarces

Commissioner Kevin Martin

Chairman Michael Powell Federal Communications Commission 445 12th Street, S.W. Washington, DC 20554

RE: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to ask that the FCC not impose new hidden charges and fees on prepaid calling card services.

Minorities, lower-income families, senior citizens, immigrants, college students and military families rely upon calling card services for a variety of needs. Many of these consumers do not have the credit history, bank accounts, or the means to pay a large deposit for local telephone service. For these consumers, a prepaid card may be the only option they have to stay connected – to make phone calls to look for a job, for affordable housing, make a doctor's appointment, or stay in touch with family and friends.

These cards offer convenience and predictable cost, as there are no hidden fees or charges. In economically disadvantaged areas, consumers literally risk being disconnected if the prices of these cards increase. Prepaid calling cards are indispensable for these and other consumer groups because they are an affordable alternative to regular and wireless telephone services.

But such price hikes are precisely what the FCC will do if it inflicts new "in-state" access charges and other fees on pre-paid cards. The fees would funnel directly to large local telephone companies while the burden would fall squarely upon those consumers that can least afford to bear it.

Adding access charges to be paid to local telephone companies will substantially increase the per minute charges on pre-paid calls, jeopardizing the benefits Hispanic and other communities gain from these services. Please stop any effort to raise rates on American consumers and decide that these services are not subject to the exorbitant new access charges and other fees.

Sincerely,

ccs: Commissioner Michael Copps

Commissioner Kathleen Abernathy
